

# About **us**

A leading company that seeks to provide high-quality products and services in many different fields in Egypt, and we provide installation services, technical support, modernization and development in various manufacturing fields. It also implements projects using the latest technologies and the best products while providing after-sales services by working with a comprehensive quality system to ensure continuous development and improvement.

1. **Industrial engineering**
2. **Civil engineering and contracting**
3. **Medical field**
4. **Irrigation engineering**
5. **Import and export**

## **Industrial engineering**

### **Control and measurement devices Automated control works**

Providing integrated engineering solutions, including design, supply and installation in the field of automatic control, control and measurement devices in various industrial activities. Supplying spare parts from international brands in the field of control and monitoring systems.

### **Treatment and sewage plant projects**

**Electromechanical works and control of water and sewage plants and infrastructure**

**Design, implementation, installation and maintenance of desalination plants for industrial water purification.**

**Water technology.**

**Design, implementation, installation and maintenance of the chlorine system.**

**Control and measurement applications in the marine field.**

# Civil engineering and contracting

- Road works
- Complete buildings
- And maintenance

**Our goal is to provide high quality professional land surveying services**

**Developing our surveying techniques to achieve the best results**

- **Providing the community with the highest quality surveying service**
- **We are committed to using the latest computer technology and field equipment to enhance the efficiency and effectiveness of our productivity**

# ***Our tools***

**The company has a wide range of different types and models of surveying technologies and software and provides excellent technical support in different classifications.**

# ***Our projects***

**Road projects.**

**Initial infrastructure project**

# مشاريع الطرق

- **Network Budget Functioning**
- **Making Constants**
- Surveying supervision of roads
- **Quantity calculation**

# Road projects

**New Dabaa City: The first phase was completed in 2015 and the second phase in 2016**

**Suez Canal Project  
New completed 2015**

**Al Alamein Road has been completed  
2015**

**Transverse Road  
Project 1 was completed in 2017**

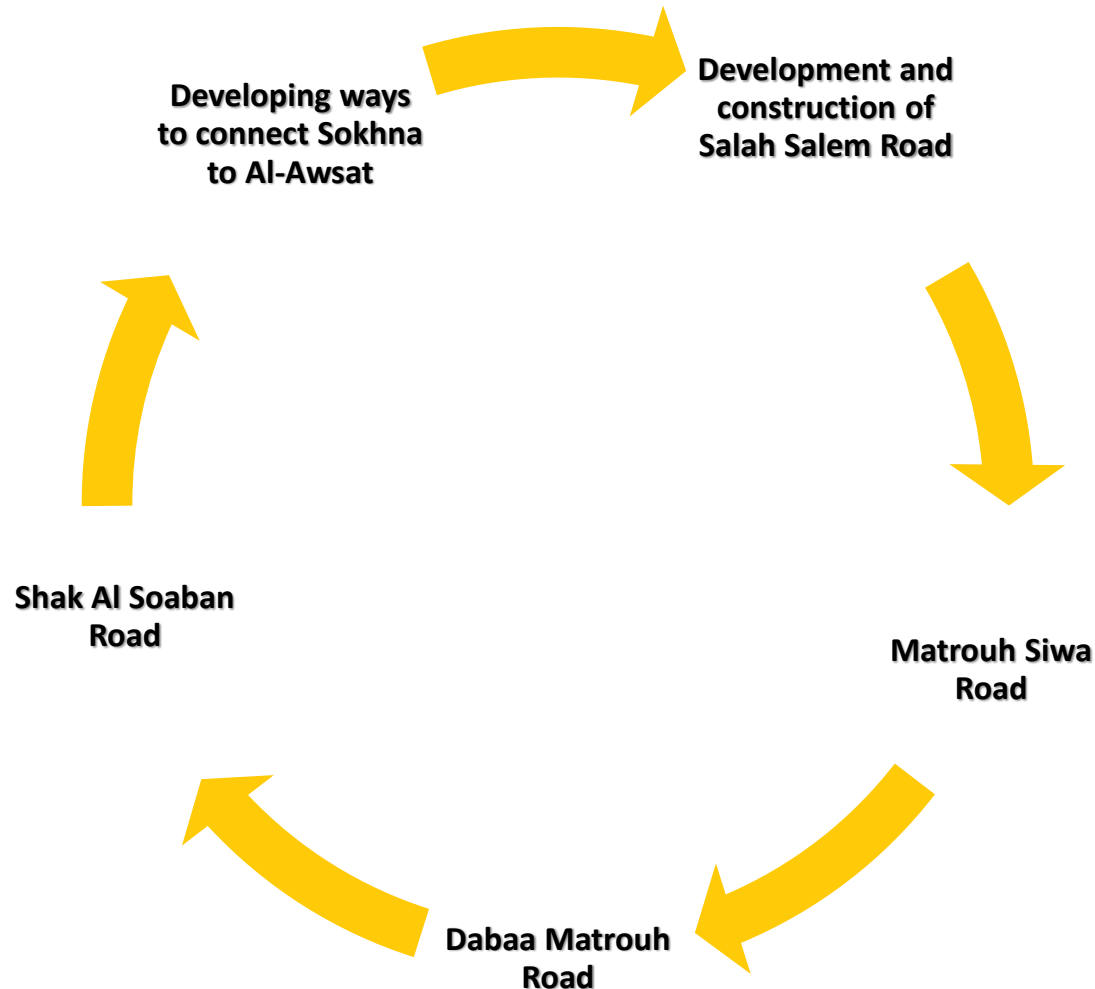

## **One of the most important road projects**

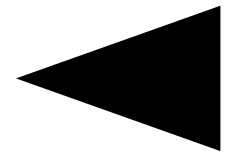

- The unified command project to combat terrorism in Sinai was completed in 2017
- The project to command the forces east of the canal, the northern sector, was completed in 2017
- The project to command the forces east of the canal, the southern sector, was completed in 2017

# ***Road projects in progress:-***

# ***Road projects completed***

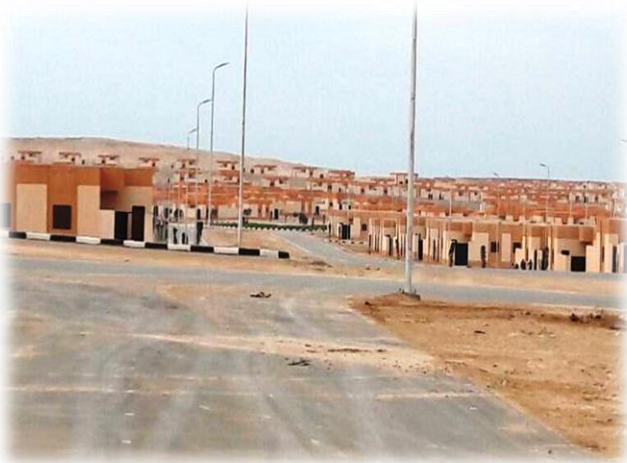

- **Hadbt Al Hamra development project**
- **The Grand Egyptian Museum Project**
- **Fayoum Road Mall of Egypt project**
- **New Belbeis Road Project**
- **Kerdasa Road Project**
- **Raising the Ismailia Al-Awja Road to a length of 63,665 km**
- **Surveying of the entire Arish Airport**
- **Central Ring Road completed in 2022**
- **Development of Wadi Ferran Road was completed in 2022**
- **Development of the Cairo-Suez Road 2022**
- **Development of Cairo-Ismailia Road 2022**
- **Developing the link between Mokattam Road and Salah Salem Road in 2022**
- **North Luxor axis**
- **Toshka Al Owainat Road**
- **Development of Sharm El Sheikh Road**
- **Gamal Abdel Nasser Axis / Fifth Settlement**
- **Aswan Airport**
- **Western airports**
- **Development of Matrouh roads**
- **Civilizations Museum Road**
- **Mokattam Corniche**

## ***Surveying and surveying supervision of project implementation-:***

- Baghdad-Bir Lahfan Road, 42 km long
- Developing Al-Muzar Road with a length of 17 km
- Development of agriculture in Toshka - Al-Owainat on an area of 275 thousand acres
- Atfih and Al-Saff, Giza Governorate, Hayaah Karimuh project
- Developing roads east and west of Al-Arish airports to Sheikh Zuweid, with a length of 34 km
- Developing the new ring road in the city of Arish with a length of 24 km
- Developing Al Shallan Road, Rafah land exit, with a length of 18 km
- Implementation of the ring road - Sheikh Zuwayed, with a length of 12 km

# ***Construction projects***

- ***New Dabaa City project, first phase, completed in 2017***

- ***New Dabaa City project, second phase, completed in 2018***

- ***New Dabaa City Project, Phase Three, work began in 2018 and was completed in 2019***

- ***The Dabaa nuclear power plant wall project was completed in 2017***

## **One of the most important construction projects**

- ***The Bedouin communities project consists of 18 Bedouin communities in various places in Sinai from Rafah to Al-Tur. Work began in 2017 and was completely completed in 2019.***
- ***West Shorouk City project, work began in 2018 and was completed in 2019***
- ***The New Rafah City Project, first phase, work began in 2017 and was completed in 2018***

***The Hikestep Military Base development project was completed in 2018***

- ***The Al Mostakbal City project for the Armed Forces on Ismailia Road, the entertainment sector, was completed in 2018***
- ***Japanese university project completed 2017***
- ***Barani Military Airport project was completed in 2016***
- ***Military entity project***

**The new Rafah city project, with an area of 550 acres, supervising the surveying implementation of construction, the road network, the utility network, and infrastructure, and conducting soil research necessary for construction work, and work is underway on it until now.**

**The Kasbah, with an area of 40 acres, supervising the surveying implementation of construction, the road network, the utility network, and infrastructure, and conducting soil research necessary for construction work, and work is underway on it until now.**

**The prison project developed in Al-Jafjafa is currently underway**

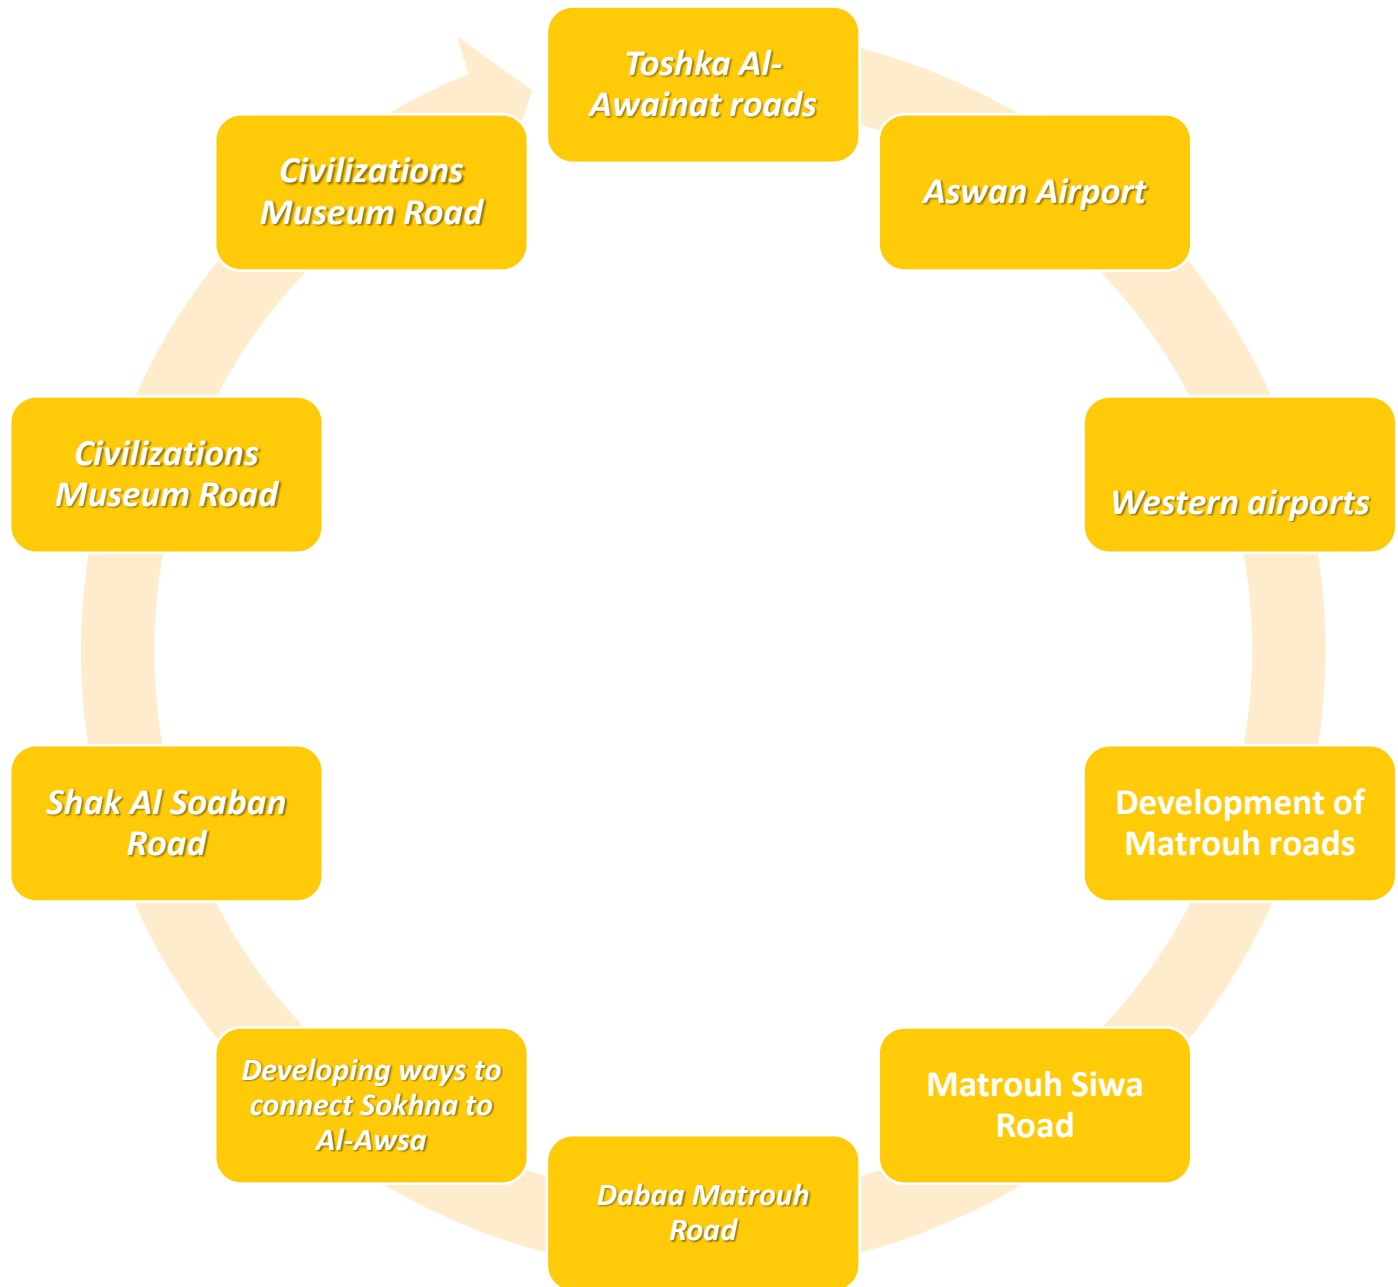

**Al-Arish Port is still under construction**

**The new city of Bir al-Abd was completed in 2022 on an area of 2000 acres**

# Irrigation engineering ►

## ► *Modernizing irrigation methods such as drip and sprinkler irrigation*

### Lining irrigation canals

Irrigation canal lining is the process of reducing irrigation water seepage loss by adding an low-lying areas of the impermeable layer to the edges of the trench. Leaks can cause 30 to 50 percent of irrigation water to be lost from canals, so adding a liner can make irrigation systems more efficient. Canal liners are also used to prevent weed growth, which can spread throughout the irrigation system and reduce water flow. Lining irrigation canals can also prevent waterlogging around canal.

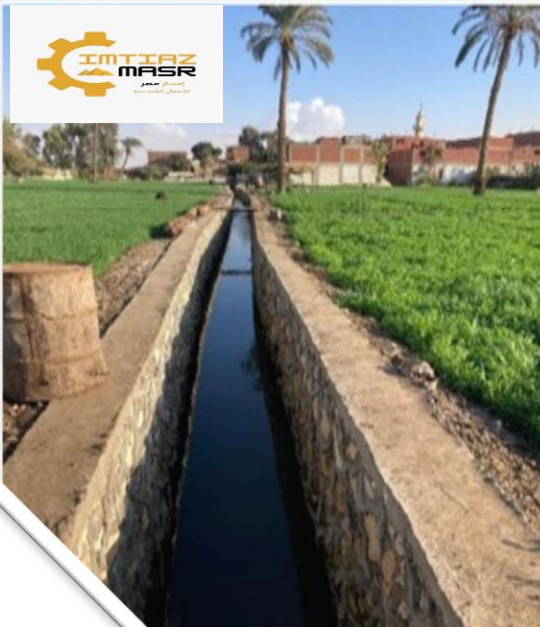

### Modern irrigation

The company is interested in everything related to irrigation devices and any developments that occur to them, and we welcome the addition of all experiences in this regard.

### Solar irrigation

The most widespread problem in the agricultural sector is the problem of saving water, which is represented by the increasing prices of fuel used to operate pumps to raise irrigation water, as well as the high prices for transporting and unloading it, in addition to the problems of diesel generators and the cost of maintaining them and their expected lifespan.

- ▶ Rehabilitating irrigation canals and moving to a modern irrigation system in many governorates of Egypt.

- ▶ Rehabilitation and development of post offices in various postal regions in Egypt
- ▶ Post office in Menoufia

- ▶ Increasing the efficiency of the Belqas Insurance Office:
- ▶ Raising the efficiency of the entire building, including civil works, nutrition, sanitation, fire systems, security rooms, and automatic control.

before

After

- ▶ **Contract for maintenance (periodic - preventive - emergency) of Tabarak Specialist Hospital**
- ▶ **In electricity, air conditioning, fire systems and civil works**

- ▶ A contract for maintenance (periodic - preventive - emergency) of the Cleopatra Hotel in Minya
- ▶ In electricity, air conditioning, fire systems and civil works

## ► Medical field and cosmetics

- **Supplying cosmetics and medical supplies from the largest local and international companies**

## ► Import and export
